

EHMA 2023

Sustainable health management:
designing solutions for evolving and complex health systems

5 - 7 June 2023 - Rome, Italy

Person Centered Information in OECD countries

Niek Klazinga, Amsterdam University Medical Centre: AMC/UvA

#EHMA2023

Person Centered Information in OECD countries

Information on effectiveness, safety and person centeredness of health care services and systems

Integrated Care, PREMs and PROMs

Public information PCI via portals: Ireland, Norway, The Netherlands

Embedding person centered information in national portals

#EHMA2023

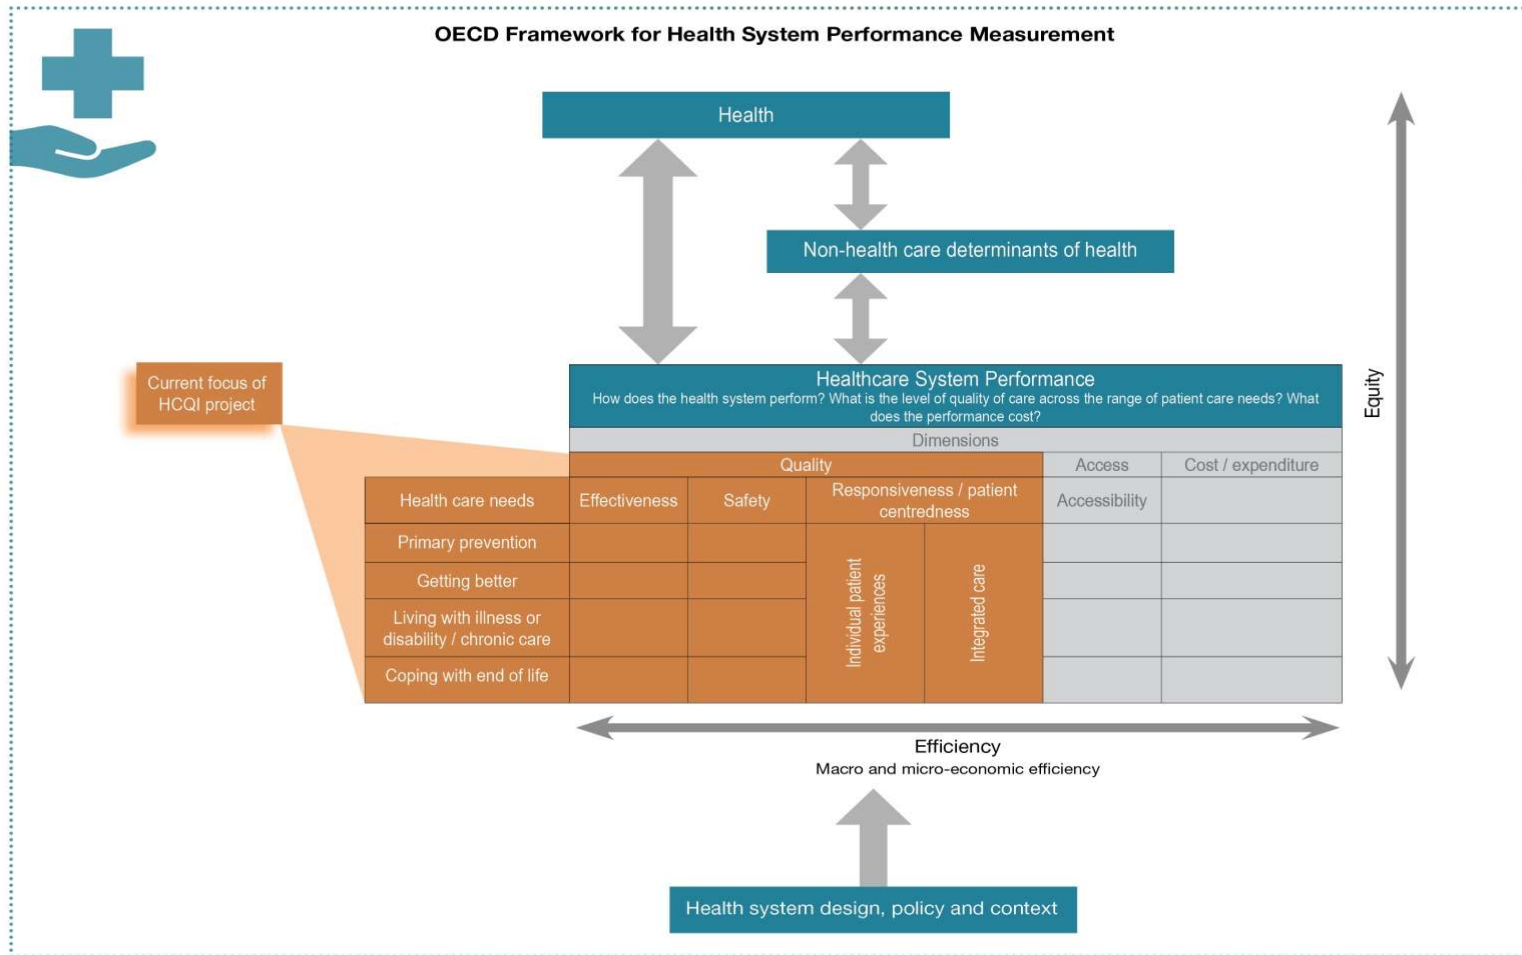

Health at a Glance: Europe 2022

STATE OF HEALTH IN THE EU CYCLE

OECD uses a framework for data collection. Health Care Quality Indicators are a central part

Integrated Care : avoidable hospital admissions

Figure 6.10. Diabetes hospital admission in adults, 2019 (or nearest year) and 2020

Note: The EU average is unweighted. 1. 2020 data are provisional and include England only.
Source: OECD Health Statistics 2022.

Integrated Care : re-admissions/mortality after hospital admission

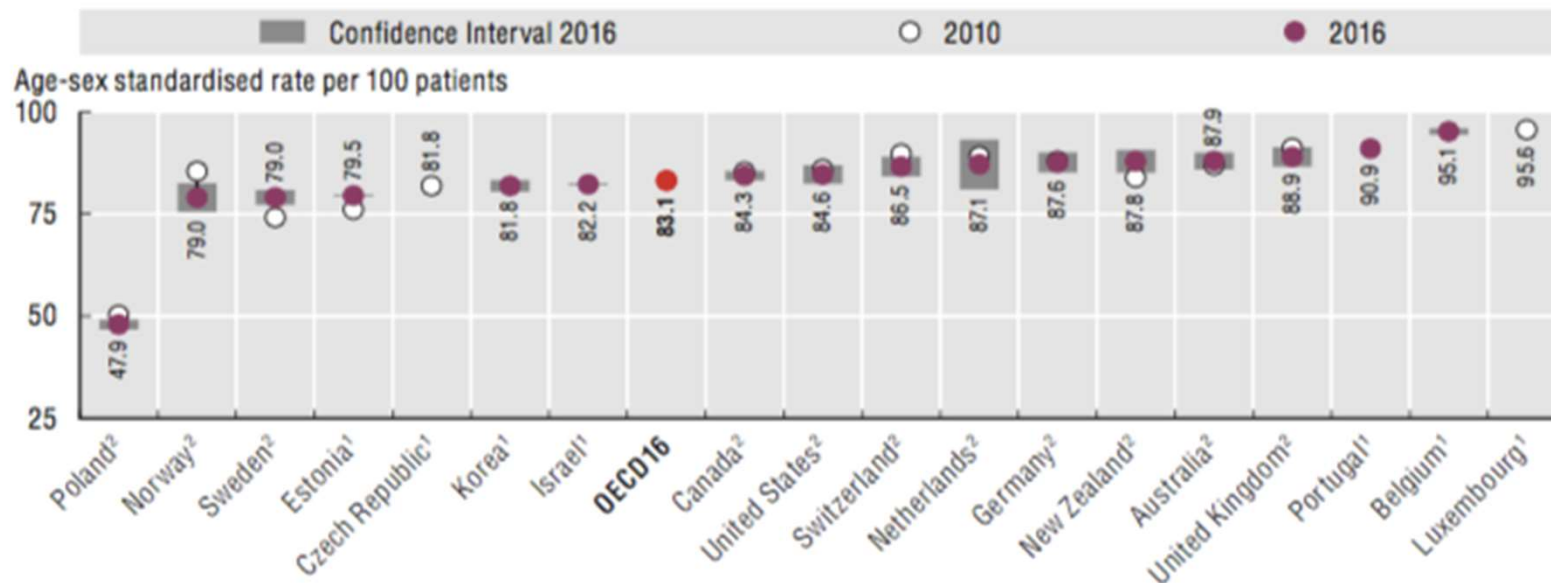

Figure 6.11. Patient outcomes one year after discharge from stroke and heart failure, 2018

Source: OECD Health Care Quality and Outcome (HCQO) Pilot Data Collection on Integrated Care 2021.

Patient Reported Experiences (PREMS)

6.3. Doctor involving patient in decisions about care and treatment, 2010 and 2016 (or nearest year)

: 95% confidence intervals have been calculated for all countries, represented by grey areas.

Figure 6.31. Share of inpatient and community mental health service users who were treated with courtesy and respect by care providers, 2021 (or nearest year)

1. Information mapped from existing survey programme. 2. Sample size between 500-100. 3. Sample size smaller than 100. 4. Web-based survey.
Source: PaRIS Mental Health Pilot Data Collection 2020-21.

StatLink  <https://stat.link/3152qb>

Patient reported outcomes measures (PROMs)

Figure 6.34. Self-reported breast satisfaction: Crude scores 6-12 months after surgery, 2020-21

Note: H lines show 95% confidence intervals. Weighted average based on site sample size was used to calculate crude average breast satisfaction. Data labels at the base of the histogram refer to the sample size at each site.

Source: PaRIS Breast Cancer PROMs pilot data collection 2021.

StatLink  <https://stat.link/xdqyr7>

Patient Reported Outcome Measures (PROMs)

Figure 6.19. Improvement in patient-reported hip replacement outcomes, 2020 (or nearest year)

Note: H lines show 95% confidence intervals. 1. Postoperative collection at 6 months (all others at 12 months).

Source: PaRIS Hip/Knee Replacement Pilot Data Collection, 2020-21.

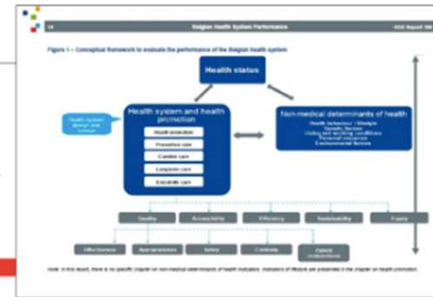

Embedding Person Centered Information in HSPA Frameworks

HSPA frameworks have been developed and used increasingly across countries

• Estonia

• Belgium

• Croatia

• Lithuania

• Ireland

• Slovenia

Embedding Person Centered Information in National Portals

- How does the information fit in the overall framework
- How does it built on existing national/regional data collection
- What is the purpose and scope of the national portal
- What is the fitness of the reported information given the scope and purpose of the portal

EHMA 2023

Thank you !
